

Newborn Photo Session Investment is \$225.

The focus of this session is your newborn baby. If possible, it is best to take these photos within the first 10 days of birth. Please schedule this session during your pregnancy, preferably a few months before your due date.

Sessions last about 90 minutes - 2 hours because we want to allow time for diaper changes, feedings and relaxation. These sessions typically take place in the comfort of your home.

*** Included in the Newborn Session cost are 25 of the best color images chosen by [green leaf photography](#), provided to you on a flash drive. For an additional \$100 fee you will receive double the images in a variety of finishes (color, black & white, and specialty finishes). ***

Additional Information:

For locations 20 miles or more from Waconia, MN, a fee of \$30 per hour drive time will be added.

Please feel free to contact [green leaf photography](#) should you have any questions. We look forward to working with you to provide unique, quality portraits you will cherish.
